**MPOWER COMMUNICATIONS CORP.
STATEMENT OF CPNI COMPLIANCE PROCEDURES**

Mpower Communications Corp maintains all CPNI in a customer management and billing system. This system is protected against unauthorized access by training and the use of security policies and procedures that control access to and usage of the system. Access and usage is limited to employees via management authorization and individual access is controlled via multiple levels of identification and password protection.

Personnel who are authorized to access CPNI are trained in the authorized uses of this information. Any employee who violates the authorized procedures for access to this information is subject to discipline, up to and including termination of employment.

Mpower Communications Corp does not use CPNI in situations where prior approval from the customer would be required.

Although Mpower Communications Corp does not conduct sales and marketing campaigns using CPNI, if Mpower changes its policy, it will maintain a record of all sales and marketing campaigns that use CPNI.

Mpower Communications Corp has established a procedure for supervisory review of all marketing activities to ensure compliance with the FCC's rules governing CPNI. The Vice President, Marketing must review and approve any requests to market to the existing customer base using CPNI.

Mpower Communications Corp account representatives may access a customer's CPNI during the course of a conversation with the customer, solely for the duration of that conversation, upon oral authorization by the customer. Each account representative is required to inform the customer of his/her right to deny access to the CPNI before requesting this consent. All communications with customers are annotated with date and time in the customer management and billing system.
